RESTORATION NEWS

SPRING 2006

New **MAXGrip** Carpet Clamp

Still floating carpets sometimes? We've designed a new carpet clamp for easily attaching to the Sahara Pro X3 and Sahara HD TurboDryers. It grips securely but won't damage wet carpets during drying, and it's easy to use the next time you plan to float carpets.

Introducing the Upcoming **SYMPOSIUM** plus **CONNECTIONS!**

SAVE
\$100

We are gearing up for the ultimate education event: the 2006 Dri-Eaz Restorative Drying Symposium in conjunction with the Connections Convention and Trade Show. We hope to see you at this big event that combines the premier business and technical education of our Symposium with the industry's largest trade show—Connections. Take advantage of back-to-back education events offering a comprehensive line-up of drying, marketing and business experts to help you build an even more successful business. You will gain new ideas from the industry's top national speakers and experts, network with fellow restorers and even learn how to avoid business pitfalls. It's time to arm yourself with the best practices for improving your business all year long.

And, when you register for both the Symposium and Connections Trade Show together, you'll save \$100. Join us September 20 and 21, 2006 for our Symposium in Las Vegas. Then stay for Connections, September 21-23, also at the Hilton in Las Vegas.

The Ultimate RESTORATION TOOL:

The Sahara PRO X3

Dri-Eaz TurboDryers® that last for the long term have quality built right in. They incorporate more durable parts and manufacturing methods that ensure that your equipment will stand up in the rugged restoration environment. When you purchase a Dri-Eaz TurboDryer, your long term savings is greater than when buying a lower priced model that breaks down and results in a shorter term investment. Many Dri-Eaz customers report that their TurboDryers last 10-15 years, much longer than competitive airmovers.

For example, when we designed our new Sahara Pro X3 TurboDryer with built-in outlets and circuit breakers, we used a more expensive mechanical breaker that will trip rarely compared with cheaper thermal breakers that are known to nuisance trip frequently.

The Sahara Pro X3 offers:

- Lower amp draw (three speeds – 3, 3.5 and 4 amps)
- Daisy-chain capabilities
- Built-in outlets and circuit breakers (eliminating the need to keep stocking and replacing extension cords)
- An underside drying vent (for drying directly under the airmover)
- Quick disassembly for cleaning
- Easy-grip handle, stackable design for storage
- MICROBAN® antimicrobial protection

So why not make a longer term investment in a product that will take care of your drying needs for the long haul. Visit the Virtual Training Center online to learn more about the new Sahara ProX3 at: www.dri-eaz.com/VTC

SAHARA SPECIFICATIONS	PRO X3	HD	E	Q	D

The New GE Protimeter RESTORATION KIT

The ultimate moisture measurement system is now available. With the GE Protimeter Restoration Kit you get both the new full-range MMS Plus and Hammer Probe. Both units come packaged together in a heavy-duty carrying case. And now, **through July 31, you can get the carrying case FREE when you purchase the Restoration Kit.***

The full-range MMS Plus includes hygrometer, pin and pinless measurement modes. It measures 0-100% RH and 32-122° F with the Humistick™ probe, providing temperature, dew point, GPP, moisture content and data logging. It even stores and downloads up to 1,000 measurements. The restorer-tested rugged GE Protimeter Hammer Probe works with the MMS Plus to measure moisture in structural materials like subfloors and framing.

For more information about our new Restoration Kit please visit: www.dri-eaz.com/restorationkit

*Case available only as part of the Restoration Kit.

How To

DISASSEMBLE YOUR NEW SAHARA for cleaning

Equipment only lasts as long as the amount of care that is taken through cleaning and maintaining each piece. It's important that you clean your equipment regularly in order to prolong its use for the long haul. Excess dirt buildup can make the wheel out of balance or increase heat in the motor, either of which can reduce the longevity of the unit. We've now made thorough cleaning easier with the new line of Sahara TurboDryers. Here are quick steps for disassembling your new Sahara for cleaning.

TO CLEAN INTERIOR (as needed):

- 1** Remove grill and blower wheel using a Phillips #2 screwdriver to remove 2 screws.
- 2** Next, remove inlet grill and loosen the blower wheel shaft nut (3/8" socket driver).
- 3** And then, pull the blower wheel out of the unit.

TO REMOVE CONTROL PANEL AND MOTOR

- 4** Rotate the unit onto its side so that the controls are facing up. Unscrew 2 screws securing cord guard (#2 Phillips screwdriver).
- 5** Remove cord guard.
- 6** Then remove 4 motor mount bolts with a 3/8" nutdriver.
- 7** And last, pull motor assembly out of the housing.

TO REASSEMBLE UNIT

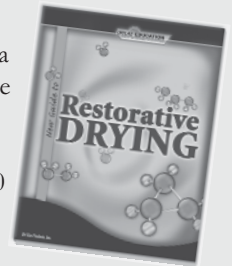

- A** Follow the steps above in reverse order (starting with 8 and finish at 1)

NOTE: Before tightening shaft nut on wheel, ensure that bolt is aligned with flat spot on shaft, shown in picture A.

NEW GUIDE TO Restorative Drying

It's the essential handbook for professional restorers like you and it will be available this summer.

This new book includes a bonus CD-ROM with the Restoration Project Manager documentation system and more than 40 restoration business-related forms.

Our very own Dri-Eaz instructors teamed up to create a new reference for the industry, and the new textbook is complete with all the latest drying techniques. Written and organized with your needs and priorities in mind, the *New Guide to Restorative Drying* includes:

- Ready-to-use formulas for equipment placement
- Real-life examples of drying challenges and solutions
- Sample forms and monitoring documents
- Pages and pages of helpful charts, illustrations and photos!
